Report on the Session on Effects of Tobacco on Physical Health

Date: 10th January, 2023

Venue: Room No 301

Participants: 31 students

The session on the "Effects of Tobacco on Physical Health" was to raise awareness among the students about the detrimental impact of tobacco consumption on their physical well-being. The session aimed to educate and inform the students about the various health risks associated with smoking and the importance of leading a tobacco-free life. The session was organized by Bunts College Higher Education (Night College) in Room No 301 and was conducted in the evening to ensure maximum student participation. A total of 31 students attended the session. The speaker discussed in detail the various health risks associated with tobacco consumption, including lung cancer, heart disease, chronic obstructive pulmonary disease (COPD), and many other ailments. The students gained a comprehensive understanding of the severe consequences of smoking. The session included a Q&A segment where students could ask questions and seek clarifications. This interactive discussion allowed for a deeper understanding of the subject and addressed any concerns or queries the students had. To make the information more accessible, the presentation included visual aids such as images, graphs, and charts, which helped in conveying the message effectively. Real-life testimonies from individuals who had successfully quit smoking were shared. These personal stories added a relatable dimension to the session and inspired the students to consider quitting tobacco. The speaker highlighted how tobacco use could adversely affect academic performance and encouraged the students to maintain a healthy lifestyle for better educational outcomes. Information about resources available for those looking to quit smoking and access to support groups were provided to the students. This gave them practical tools to take action if they or someone they knew wanted to quit tobacco use.
